**Subject: Recommendation for Mr. Adrián Zazpe – ESA-FAIR Radiation Summer School**

Madrid (Spain), April 3, 2025

Dear Selection Committee,

It is my pleasure to strongly recommend Mr. Adrián Zazpe for participation in the ESA-FAIR Radiation Summer School at GSI. As his PhD advisor at Universidad Complutense de Madrid, I have had the opportunity to closely observe his dedication, scientific curiosity, and technical skills in the field of radiation biophysics.

Adrián holds a bachelor's degree in biomedical engineering and a master's degree in nuclear physics, a combination that provides a strong interdisciplinary foundation for radiation research. Currently, he is pursuing a PhD focused on the development of advanced instrumentation for radiobiology experiments, particularly in the study of FLASH radiotherapy. This cutting-edge field, which investigates the potential benefits of ultrahigh-dose-rate radiation in cancer treatment, aligns closely with the objectives of your summer school.

Through his research, Adrián has demonstrated exceptional abilities in experimental design, detector development, and data analysis. He has been instrumental in optimizing irradiation setups and improving dosimetry techniques to better understand the biological effects of FLASH radiation. His work is not only technically rigorous but also has significant implications for advancing radiotherapy.

Beyond his technical competence, Adrián is an enthusiastic learner and an excellent team player. He has actively collaborated with physicists, biologists, and engineers, showcasing strong communication and problem-solving skills. I am confident that participating in the ESA-FAIR Radiation Summer School will provide him with invaluable knowledge and networking opportunities, which will further enrich our research.

I strongly support Adrián Zazpe's application and have no doubt that he will contribute meaningfully to discussions and activities during the program. Please do not hesitate to contact me should you require any additional information.

Your sincerely,

Prof. Daniel Sánchez Parcerisa
