Recommendation for Mr. Adrián Zazpe – ESA-FAIR Radiation Summer School

Dear Selection Committee,

It is for me a pleasure to send this letter to support the participation of Mr. Adrián Zazpe in the ESA-FAIR Radiation Summer.

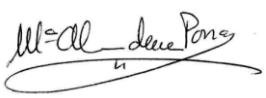

Adrián is doing a PhD focused on the development of new advanced equipment required for radiobiology experiments (mainly FLASH radiotherapy). In this regard, it is important to mention his background: he got a bachelor's degree in biomedical engineering and a master's degree in nuclear physics, which has allowed him to get an interdisciplinary knowledge, required to carry out his PhD research project.

I have had the opportunity to follow his work during the last 2 years as his research is a part of a coordinated project developed by different groups, including the one I am leading at Complutense University focusing on the biological effects of radiotherapy. We have meetings every two weeks, where we share the latest results of the project. In these meetings, Adrian has always demonstrated to be a very brilliant student with a great capacity in developing new equipment and tools to optimize irradiation to improve our knowledge on the specific effects of FLASH radiotherapy on cancer and normal cells compared to conventional radiotherapy.

In addition to all this, I must highlight that Adrian is very enthusiastic about his work, and a very thinkable and collaborative person. All of them are important qualities for the efficient development of research projects in collaboration with different groups from different fields, including biologists.

Based on all the above comments, I am totally confident that he will highly benefit from his participation in the ESA-FAIR Radiation Summer School, acquiring new knowledge, which will contribute to his training in the field and the development of his thesis work. Therefore, I strongly support Adrián Zazpe's application.

Sincerely yours,

Almudena Porras,
Full Professor in Biochemistry and Molecular Biology,
Biochemistry and Molecular Biology Department,
Faculty of Pharmacy, Complutense University from Madrid (UCM),
Madrid, Spain
